

INVESTICE DO ROZVOJE VZDĚLÁVÁNÍ

POPULATION

Tematická oblast	The Czech Republic
Datum vytvoření	14. 6. 2013
Ročník	2. ročník, sexta
Stručný obsah	Pomocí otázek a vzorových odpovědí se opakuje probrané učivo
Způsob využití	Opakování po probrání učiva; upevnění učiva
Autor	Mgr. Jiřina Juříčková
Kód	VY_32_INOVACE_06_AJUR19

POPULATION

- Give some main data about the population of the Czech Republic
- What does the age pyramid say about the population of the Czech Republic?
- What is the population distribution?

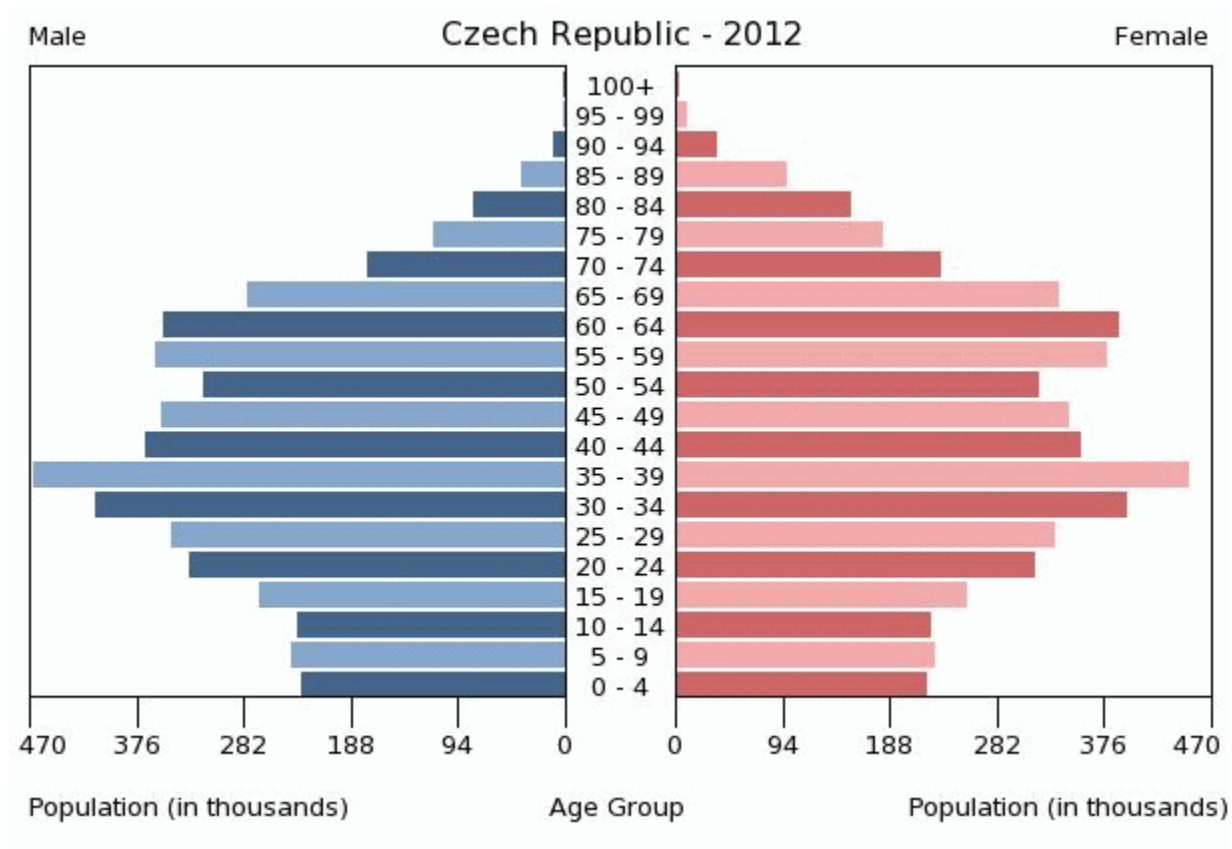

POPULATION – BASIC DATA

- Give some main data about the population of the Czech Republic
 - 10,177,300 people
 - about 63.7% -Czech, 4.9% - Moravian, 1.4% - Slovak
 - Czech language -95.4%, Slovak language -1.6%
 - non-believers 34.2%, the most widespread church - Roman Catholic - 10.3%
 - literacy reaches 99%
 - life expectancy is 77.38 years
 - 73.4% urban population

POPULATION – POPULATION PYRAMID

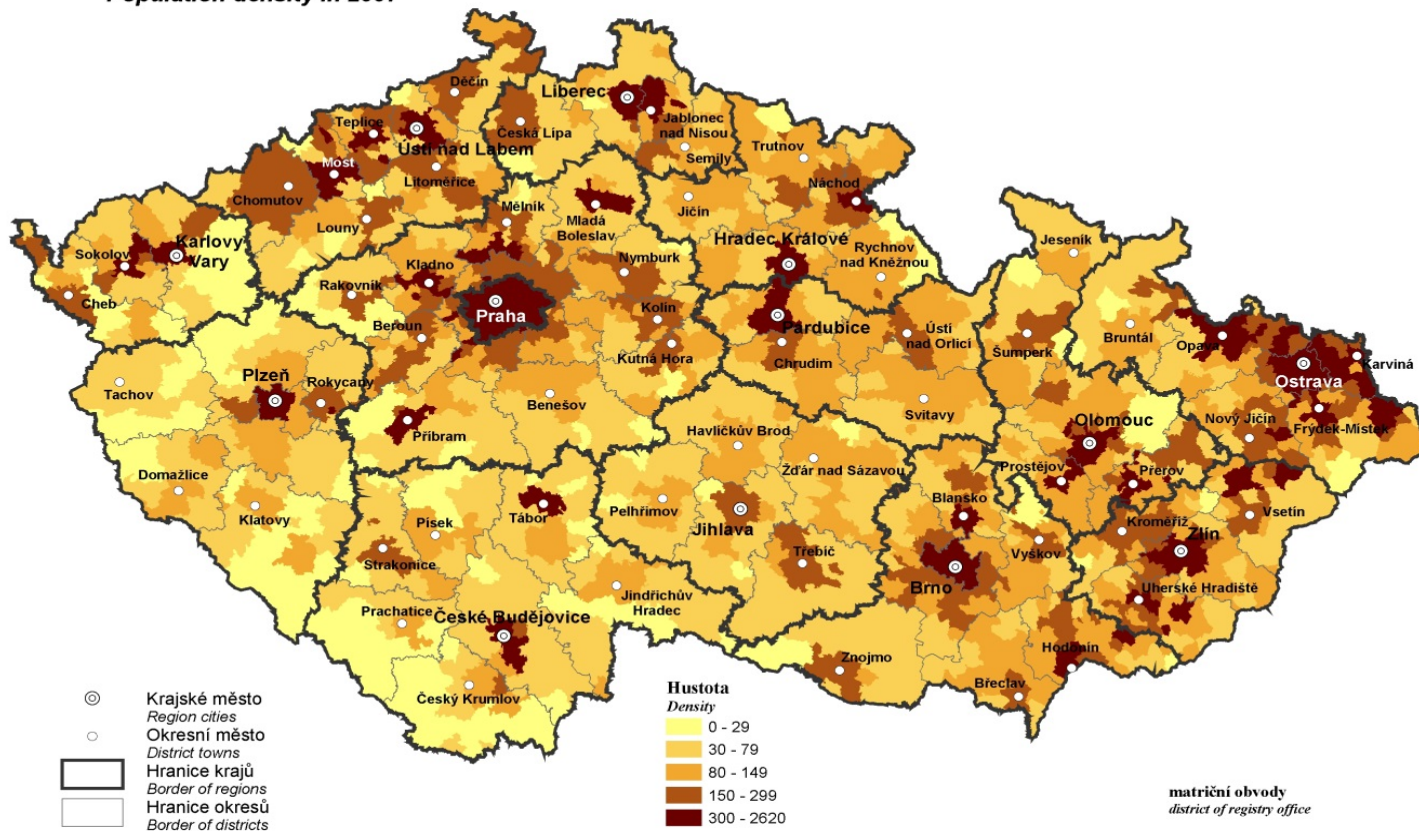

POPULATION – POPULATION PYRAMID

- There are quite small numbers of young people up to the age of 19
- The age group of people from 20 to 49 is still the largest one
- There is a large group of people from 50 to 74
- The life expectancy is slightly longer for women than for men

POPULATION – POPULATION DISTRIBUTION

Počet obyvatel na km² v roce 2007
Population density in 2007

POPULATION – POPULATION DISTRIBUTION

- Population distribution in the Czech Republic is not equal
- People live mainly in the areas of large cities – Prague, Brno, Olomouc, Ostrava, Plzen
- Then they live in industrial areas – Krusne Mts. Foothills, Ostrava basin
- And then they live in fertile basins of Moravia
